TETONS NATIONAL PARK

Called: The Mountains of Imagination

YOUNGEST MT RANGE OF THE ROCKIES

The 310,000 acres of the Grand Teton National Park had a reluctant start. Many were opposed to the idea of reserving the land, but luckily the mountain range stands as a testament to their efforts; that we all get to enjoy today. The Tetons offer an outdoor wonderland in addition to being next to Jackson Hole, a posh town with many amenities. If you want to take in more beauty, it's just 10 miles from the Nation's first national park, Yellowstone, coming in at 2.2 million acres. You could visit just to go on scenic drives but bring your hiking shoes to get the most out of this valley and it's stunning mountain range.
